Construí Tu Futuro - Comunicación Efectiva

Alejandro Matesa

Data & Operations Analyst | Fintech Operations | Process Improvement | Building Digital Products | Video Game Development Student
Argentina

Summary

I like understanding how things work. Once I understand them, I naturally start asking how they could work better. Throughout my career I have worked in healthcare, fintech, customer operations, data analysis, web development, and now game development. While the industries have changed, the way I work has remained the same: understand the problem, break it down, learn what is needed, and build a practical solution. I don't consider myself defined by a single role or technology. My strength is learning new domains quickly, connecting ideas from different disciplines, and turning unfamiliar problems into structured solutions. That's the approach I have followed throughout my career, regardless of the industry or the tools involved. Today I am applying that mindset to data analysis, digital products, automation, artificial intelligence, and game development. I enjoy building, experimenting, and continuously improving the way people, teams, and systems work. I am looking for opportunities where curiosity, adaptability, analytical thinking, and continuous improvement are valued alongside technical skills. I believe the best results come from understanding problems deeply before choosing the right solution.

Experience

Transcom

3 years 3 months

Business Operations Support

January 2023 - September 2024 (1 year 9 months)

Zagreb, Croatia

Supported merchants using Klarna's payment solutions by investigating technical and operational issues across multiple e-commerce platforms, including Shopify, WooCommerce, and PrestaShop.

Worked closely with merchants to understand reported problems, distinguish symptoms from root causes, and coordinate with internal teams when technical escalations or process improvements were required.

Guided merchants through integrations, onboarding, and troubleshooting while ensuring information was accurately documented and communicated across support, product, and technical teams.

Identified recurring operational issues beyond individual cases, helping improve documentation, streamline support workflows, and strengthen collaboration between teams.

Data Analyst

March 2022 - January 2023 (11 months)

Zagreb, Croatia

Analyzed customer support performance across international teams serving Spain, the United States, Germany, and Portugal, transforming operational data into actionable insights for management and Quality Assurance.

Identified recurring issues, performance trends, and root causes affecting customer experience by combining KPI analysis with operational context rather than relying on metrics alone.

Designed reports and dashboards that supported decision-making, highlighted improvement opportunities, and helped operations teams prioritize actions across more than 80 customer support specialists.

Worked closely with QA, Operations, and Team Managers to translate business questions into structured analyses, helping teams understand not only what was happening, but why it was happening.

Customer Service Representative

July 2021 - January 2023 (1 year 7 months)

Zagreb, Croatia

Provided customer support for the Spanish market through chat and email, investigating financial and technical issues related to fintech products and guiding users toward effective solutions.

Focused on understanding each problem before proposing a solution, documenting recurring cases, identifying patterns, and sharing insights with Quality Assurance and Operations teams.

Consistently achieved quality and response-time objectives while contributing to improvements in support processes, internal documentation, and knowledge sharing.

Self Employed

Digital Projects

January 2017 - December 2020 (4 years)

Argentina

Helped small businesses solve practical digital needs by designing websites and lightweight online solutions through referral-based projects.

Worked directly with clients to understand their goals, organize content, configure platforms, and deliver solutions adapted to each project's requirements rather than following a fixed approach.

Combined technical implementation with continuous learning, selecting the most appropriate tools for each project and adapting to new technologies whenever required.

Salud y Gestión S.A

Administrative-Medical Audit Coordinator, Osplad / SYG

November 2014 - January 2019 (4 years 3 months)

C.A.B.A, Argentina

Coordinated administrative operations supporting medical audit processes across multiple healthcare facilities, ensuring accuracy, regulatory compliance, and effective collaboration between departments.

Reviewed operational workflows, documentation, and billing information to identify inconsistencies, improve process reliability, and support informed decision-making.

Developed procedures, standardized documentation, and created practical guidelines that improved efficiency, reduced errors, and simplified team training.

Worked closely with medical, administrative, and management teams, continuously identifying opportunities to improve day-to-day operations and strengthen internal processes.

CMI

9 years

Medical Billing Coordinator, CMI S.A

2011 - 2014 (3 years)

Argentina

Managed billing operations for hospitalized patients, reviewing medical documentation, validating information, and ensuring compliance with healthcare regulations and insurance requirements.

Analyzed billing data and operational records to identify discrepancies, improve reporting accuracy, and support audit processes involving multiple stakeholders.

Standardized documentation and information flows to improve consistency, reduce errors, and strengthen collaboration between administrative and healthcare teams.

Pharmacy Operations Supervisor, CMI S.A

2005 - 2011 (6 years)

Argentina

Supervised pharmacy operations, inventory control, and medication distribution while ensuring regulatory compliance and operational continuity within a healthcare environment.

Developed practical spreadsheets, procedures, and organizational tools that simplified daily operations, improved inventory visibility, and supported more efficient planning.

Worked closely with different departments to coordinate resources, solve operational issues, and continuously improve internal workflows through practical process improvements.
